Projects:

Him Rakshak – Disaster Alert & Environment App | Android (Kotlin,FastAPI,Mongodb)

- Enables users to report forest fires, pollution, or illegal activities with photos and location tagging.
- Sends real-time alerts for floods, landslides, and fires based on area data.
- Includes emergency guides, volunteer registration and AI Chatbot.

DevBot – AI Chatbot | *Android (Jetpack Compose, Kotlin)*

- Integrated **Google's Gemini API** to create an AI chatbot with real-time responses.

Expense Tracker App | *Android (Jetpack Compose, Kotlin)*

- Built a finance app with **color-coded categories**, transaction history, and dynamic charts.
- Used **Room Database** for local storage and **Material3** for UI.

Automatic Certificate Generation – Python

- Created a Python app to automate certificate creation using **Pillow** for image editing, **openpyxl** for Excel data, and **Selenium** for sending certificates via WhatsApp.
